

KAZAAN CAPABILITY STATEMENT

Summary

We design, build, and deliver production grade software for trading, risk, compliance, and data platforms. Deep experience across .NET, Python, TypeScript, Azure, and event driven architectures. Outside IR35 • UK/EU time zones • Remote/Hybrid London.

Core Services

- Custom Software & Platforms — .NET 8, Python, TypeScript, microservices
- Architecture & Delivery — roadmaps, leadership, solution & data architecture
- Cloud & Data Engineering — Azure, CI/CD, Terraform/Bicep, streaming & analytics
- Regulatory & Controls — reporting integrations, lineage, privacy-by-design
- Performance & Modernisation — refactors, reliability, cost/perf optimisation
- Advisory & Reviews — architecture due diligence, delivery assurance

Experiences

15+ years building software for capital markets & banking (front-office to risk/finance). **UBS (15 years)**; other clients include Munich Re, ReformIS, Centro. Selected engagements: Equity & FX analytics platform; Counterparty risk data services; Trade surveillance integrations; Regulatory reporting pipelines with automated lineage & controls.

Core Stack

C#/.NET 8, Python, TypeScript/React, SQL Server, Postgres, Kafka, Spark/Databricks, Azure (AKS, Functions, APIM), Terraform/Bicep, GitHub Actions; Agile/Scrum, Kanban, CI/CD, TDD.
